

CLUB HDF WATER RESISTANT BOARD

Water, not to worry!

When it comes to creating beautiful decors, Greenpanel CLUB HDF is a great choice for architects, interior designers, and carpenters. It's water resistant, has high density, is versatile, durable, tough and easy to cut and shape; qualities that make it a great medium to work with.

Greenpanel

Greenpanel is India's largest manufacturer of wood panels. Greenpanel is the largest producer of MDF in the country. Our manufacturing plants have a combined annual capacity of more than 540,000 cubic meters of MDF. This is complemented by our robust distribution network of 3,000 plus outlets spread across the country.

Our Range

CLUB HDF | Pre-laminated MDF | Exterior Grade MDF | Interior Grade MDF | CARB P2 MDF

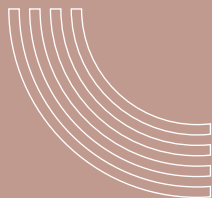

Greenpanel CLUB HDF

Resistant to water & fungus.
Irresistible applications.

CLUB HDF is a high density and high water resistant board that makes it ideal for wet area application and has great load bearing capacity. The high-performance board has excellent water resistance, high density, durability, and exceptional dimensional stability. That's not all, these boards are resistant to virus, fungus, termites and borer proof.

Greenpanel CLUB HDF is a new class of wood-based panel product and a perfect substitute for local plywood. Uniform thickness, super smooth surface, high screw holding capacity and internal bond makes Greenpanel CLUB HDF most suitable for multi-purpose applications.
