BRAND VISION

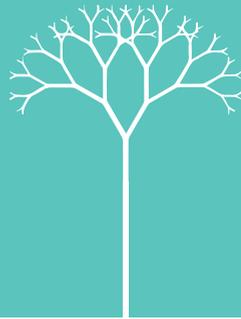

Every organisation in this world irrespective of size and domain works towards building a prosperous future for itself. We believe that the key to do so is by innovating in products and exceeding customer satisfactions.

We at Greenpanel, envision the future of contemporary living spaces and then bring them to life.

We pride ourselves in coming up with innovations which help us in achieving our company's vision: To represent the infinite future possibilities in wood panelling.

Our new logo is the perfect depiction of these infinite possibilities with a seamless merging of G & P to form an infinity symbol.

KEY MILESTONES

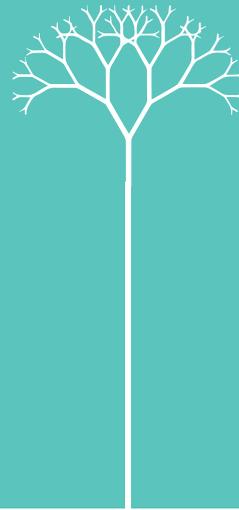

2010

Launch of Green Panelmax & commencement of commercial production at the most modern MDF plant in Uttarakhand.

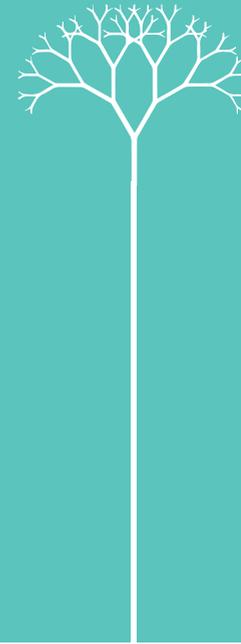

2014

Launch of Wood Floors.

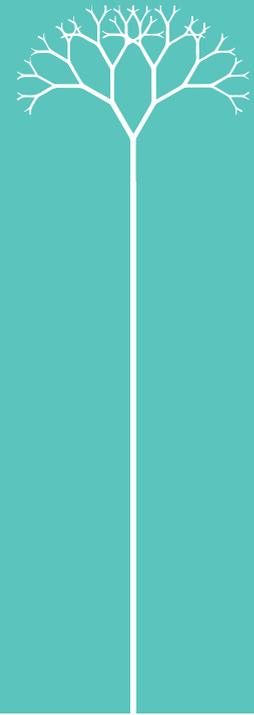

2015

Commencement of export division based out of Singapore.

2016

Signing of contracts for new MDF plant in Andhra Pradesh.

2018

Commencement of production in Asia's largest MDF plant in Andhra Pradesh.

LUXURY IN THE LAP OF NATURE

Don't you love reminiscing amidst lush forests
and birds chirping?

Oh wait. But, you're at home. Sigh.

But what if we say our flooring solutions can make you
feel that way. Quite a beautiful thought isn't it?

With Greenpanel Wood Floors,
it's like living in the lap of nature.
Our Wood Floors are not just durable, they are
eco-friendly too.
Plus they make a style statement
in every home they adorn.

DARK WOOD TO
CONNOTE LUXURY

WARM SHADES TO GIVE
A FEELING OF COSINESS

THE NEW FLOORING TRENDS- EMBRACING NATURE!

As we get more and more attuned to the modern and monotonous nature of urban life. Today, we long more for the beauty and pleasure of living amidst nature. Adopting nature and natural living practices is becoming a fast way of life internationally and its catching up in India as well.

Wooden floors with their withered, natural look lend authenticity and harmony to living spaces. The style and appearance of your room is determined by the colour of your floor. Different shades of wood can match different tastes and personalities.

Real natural tones in Greenpanel Wood Floors add timelessness.

Lighter shades stand for extra spacious look and feel,
warm shades for cosiness and darker shades for
a dash of luxury.

LIGHTER SHADES
FOR A SPACIOUS LOOK

THE GREENPANEL WOOD FLOORS ADVANTAGE

Permaclick™
Interlocking System

The most advanced flooring interlocking system available in the country gives Greenpanel Wood Floors an unmatched quality and finish. It makes the installation process easy.

Scratch
Resistant

This specially engineered surface coating makes wood floors manifold stronger and resistant to surface scratches.

Water
Resistant

The top surface treatment makes it non-porous and the Permaclick™ Technology does not allow the water to seep in. The quality of HDF makes the floors strong enough to be water resistant.

Hygienic & Easy
To Maintain

Our surface protection technology ensures dirt doesn't cling to your floor while our precise interlocking system binds the planks perfectly, allowing absolutely no room for dust to accumulate.

100% HDF
Base Core

The High density fibreboard at the core of Greenpanel Wood Floors makes them sturdier and more durable than any other flooring.

Warranty

There is a warranty of 10 years on the Prima collection and a warranty of 15 years on the Persona collection.

PERMAClick™

THE MOST SUPERIOR CLICK LOCK SYSTEM

Unlike many floors, Greenpanel Wood Floors do not have beveled edges or a V-Groove, but a 90-degree edge between two planks.

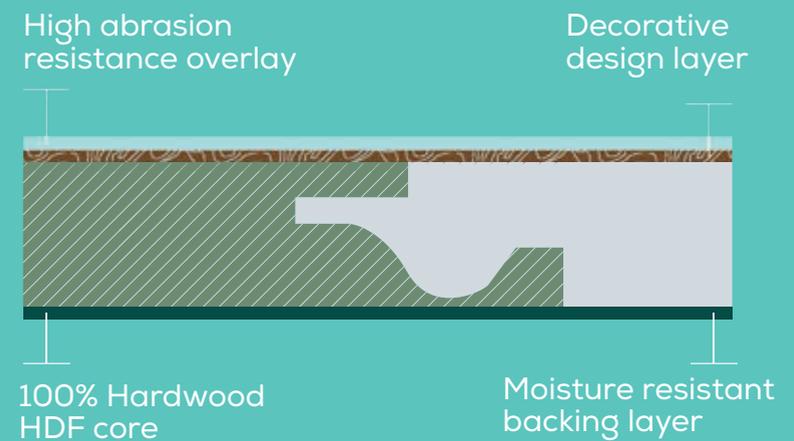

Due to imperfections in the manufacturing process of unlicensed interlocking systems made by other manufacturers, two adjoining wood planks do not sit level and are at different heights.

This results in the edge of one plank being higher than that of its adjoining plank (FIG.1).

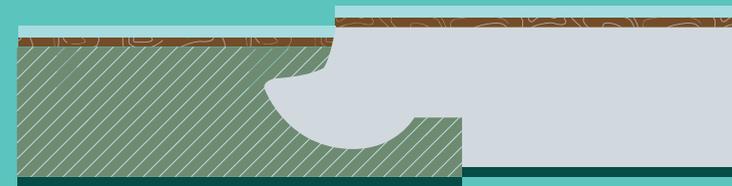

In such a situation, a 90 - degree angle results in a very sharp edge, creating risk of injury when walking barefoot or there is a risk of tripping.

To overcome this imperfection of the profile, the edges are beveled or shaped in a V-Groove to provide a gentler angle between the planks (FIG.3).

90 - DEGREE EDGE

IMPERFECT SURFACE (FIG.1)

PERFECT SURFACE (FIG.2)

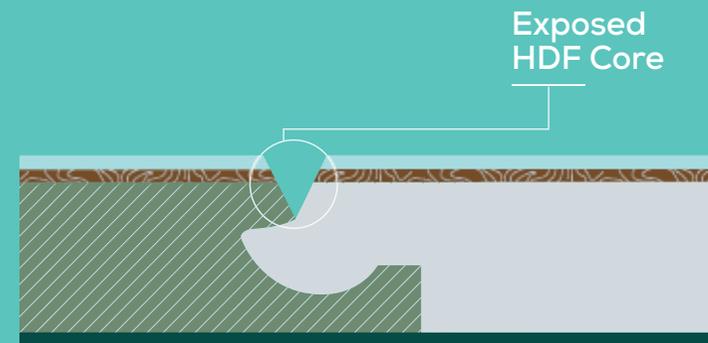

The process of beveling or V-Grooving involves trimming of each 90 - degree edge, resulting in the removal of the high-abrasive resistant layer and the decorative design layer which exposes the inner HDF core of the flooring (FIG.3). Since the protective layers get removed, this makes the HDF core highly susceptible to water ingress as well as accumulation of dirt.

Due to the unique Permaclick™ interlocking system of Greenpanel Wood Floors, the edges are always in level. There are no surface imperfections or edges sticking out.

This means Greenpanel Wood Floors have 90 - degree edges that are safe, locked together with no portion of inner HDF core exposed. As a result, the floor is highly resistant to water ingress and dust accumulation.

Greenpanel Wood Floors have a unique angle snap method of layout that fits the planks together at 90 - degree angle for a perfect seamless finish.

V-GROOVE (FIG.3)

The tensile strength of the click system seals off the floor with an air tight finish that doesn't let liquid seep in and provides superior protection against moisture. As a result, our floors are more durable with minimal wear and tear.

MAINTENANCE & CARE

Greenpanel Wood Floors are easy to maintain and clean. The laminated top layer on the planks makes it simple to keep spick and span year after year. These floors don't need any special cleaning agents or methods, just a squeezed out damp mop will do.

Sweep the floor using a standard dust mop to remove dirt and dust.

No need to use wax, polish, oil or varnish on the floor.

When necessary wipe the floor with a squeezed out damp cloth, using only water.

Do not use soap-based detergents or house hold cleaners to clean the floor.

Do not use abrasive cleaners on the floor.

In case something spills, simply wipe the floor with a dry cloth.

Use felt pads/rubber feet under furniture legs to avoid scratching.

Entry mats help in collecting sand, dirt, grit and other substances that may harm your floor.

INSTALLATION PROCESS

Laying Greenpanel Wood Floors is extremely easy with the unique Permaclick™ technology.

Easy Installation

Greenpanel Wood Floors has the unique Permaclick™ interlocking system which ensures that the planks effortlessly click together. Install laminate on underfloor heating and cooling.

Greenpanel Wood Floors are perfect for installing over underfloor heating or cooling when combined with the right underlay.

Easy to install on existing floor

Greenpanel Wood Floors can be laid over nearly any type of subfloor like concrete, stone, vinyl or ceramic as long as it is clean and dry.

THE BEST ACCESSORIES TO GO WITH

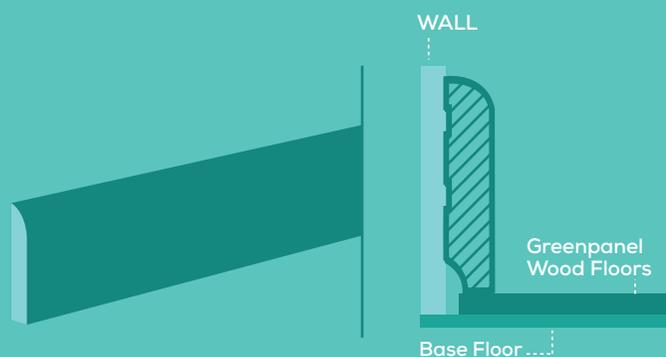

Add the perfect finishing touch with Greenpanel Wood Floors skirting and profiles. To complete the look of your stunning floor, you can choose from a wide range of designs that match every floor and style.

UNDERLAY

Greenpanel premium 2-in-1 underlay is a combination of a 2 mm underlay and a PE foil. With the ease of just rolling out the underlay, you can level the subfloor irregularity, as well as reduce the risk of transferring humidity from the subfloor to the floor panels.

SKIRTING

Provides finish to the floors by cladding the lower part of the adjoining walls.

STAIR NOSE

Covers the open edges of the floor planks and provides a seamless transition between the horizontal and vertical sections of the staircase.

T-PROFILE

Connects two sections of the floor at the same height.

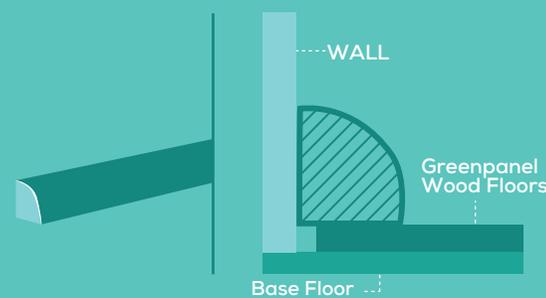

REDUCER

Provides a smooth transition from the floor to a lower surface such as tiled Floor or carpet.

BEADING

Creates a border between the floor and adjoining walls. Can be used as an alternate to skirting where skirting is not used.

GREENPANEL WOOD FLOORS WARRANTY

Greenpanel Wood Floors is a high quality product manufactured by Greenpanel Industries Limited. Our quality standards are backed by extensive warranty coverage. Greenpanel Wood Floors is designed to provide many years of resistance to foot traffic friction without showing signs of significant wear and tear. This is under the conditions provided that no abrasive substances (salt, sand and glass) have been present on the surface, the floor has been installed according to Greenpanel Industries Limited guidelines and the floor has been regularly maintained according to the manufacturer's instructions. See maintenance and care guidelines.

LAMINATE FLOORING

On fulfilment of the below conditions, Greenpanel Industries Limited grants the following warranty on its Greenpanel Wood Floors:

Prima collection - 10 years

Persona collection - 15 years

THE WARRANTY COVERS THE FOLLOWING:

Stain Resistance

Greenpanel Wood Floors is resistant to normal household stains on the decorative surface. The floor will not stain due to spills from beverages, when removed and cleaned promptly and properly.

Fade Resistance

Greenpanel Wood Floors is resistant to fading from exposure to indirect sunlight or normal artificial light with the exception of natural ageing.

Wear Resistance

With respect to claims on surface wear-through, an area on the floor panel is considered worn out only if the surface wear is readily visible (ie. approximately 9.7 square cm) and the decorative layer has been exhausted until the core material is visible. Claims for surface wear-through are unacceptable if the surface wear-through occurs at the edges/joints of the panel. Gloss reduction is not considered to be surface worn-through.

General Warranty Conditions

The warranty does not cover damage due to transportation, storage, installation, extreme indoor conditions (excessive dryness or humidity), pets, insects, water, negligence, or any other similar cause. The warranty covers only defective products exceeding 5% in m² of the total quantity purchased by the customer (excluding losses resulting from cutting boards during installation).

Obligations by Greenpanel Industries Limited

Under the terms of this warranty, the responsibility of the manufacturer, Greenpanel Industries Limited, is limited to any of the following measures, at Greenpanel's sole discretion and without any other form of compensation:

- Supply the material necessary to replace the defective boards
- Pay compensation equivalent to the purchase cost of the defective boards
