About Greenpanel

Greenpanel is India's largest manufacturer of wood panels. Our state-of-the-art manufacturing plants in Uttarakhand and Andhra Pradesh produce Medium Density Fibre Boards (MDF), Plywood, Block Boards, Veneers, Wood Floors and Doors.

Greenpanel is the largest producer of MDF in the country. Our manufacturing plants have a combined annual capacity of more than 500,000 cubic meters of MDF. This is complemented by our robust distribution network of 3,000 plus outlets spread across the country.

About G PRO

The fully-loaded ply, sourced from specially selected eco-friendly timber. G PRO is borer proof and termite-resistant with lesser susceptibility to weather variance.

Best suited for residential and commercial places.

Area of Application

Made from selected species, G PRO Plywood and Block Boards are the first choice for many when they think of doing their interiors. This is because, along with being weather proof, these boards are anti-fungal and borer resistant too, making it ideal for application in residential & commercial places.
